Magic, Juggling and Circus Arts, Drawing, Cartooning,
Manga, Mindfulness, Relaxation Techniques, Marine Biology
and Empowered Learning (Organization and Study Skills)

Dear Dr. Webbink

I just want to let you know how much my daughter enjoyed her time at your center on Dec. 20. She tells me she "can't wait to go again! When can I go again?!?" Just today she said she wants to learn about computers and wants to make a web site; perhaps you can add that to the list of possible subjects for another day.

Unfortunately, my daughter isn't showing that level of motivation with some of her schoolwork. I'm not surprised; the rote drill and repetition can be a real drain. Lately she's not working to potential in her area of greatest strength: math, and I'm concerned the teacher, curriculum etc. are not a good fit for her. I'm sure her interaction with your staff will help to encourage and motivate her.

Thank you for inviting her to be a part of your program. I very much appreciate it!
